Summary

I want to grow and understand software engineering better in order to make our everyday life much simpler and to learn more about software development . As i am more interested in machine learning and cyber security .Python is the language i am comfortable with when it comes to programming ...and i am willing to learn more , i learn and adapt quickly to new programming languages , i am interested in Quality assurance,I would also love to work with a diverse team where i can grow in the fields of design and development and put my skills to good use in long term , i am eager to learn any language of development in the tech space

Experience

Html intern

AO GROUP

Feb 2023 - Apr 2023 (3 months)
